

# Using Caterpillar GIS-Approved API Testing Tools

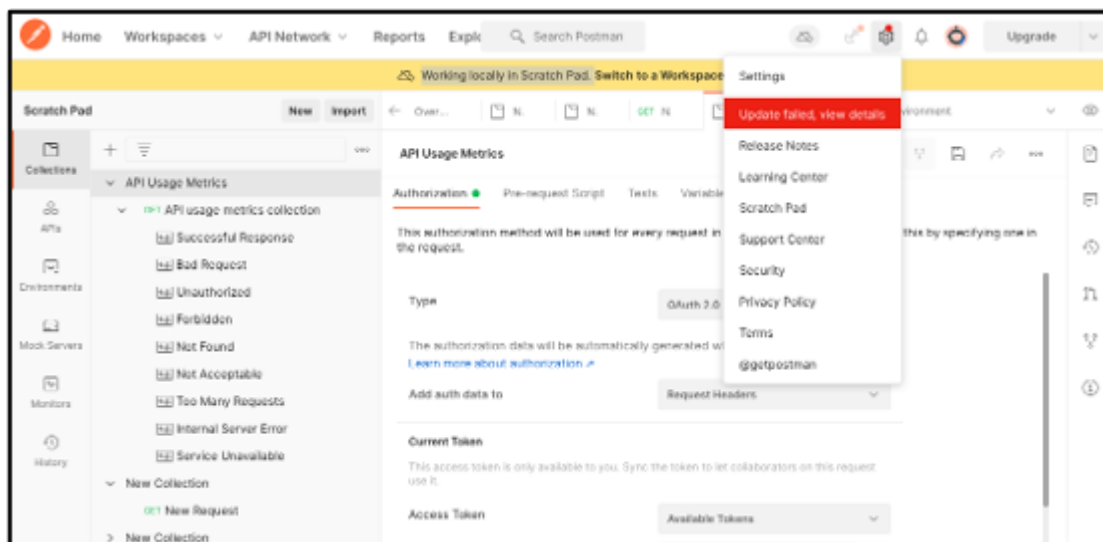

The following API testing tools are GIS-approved for use by Caterpillar developers:

- **SoapUI by SmartBear**

- Free 7 day trial available
- Available for download at: <https://smartbear.com/ppc/ready-api/soapui>

- **Postman**

- Free version available
- Available for download at: <https://www.postman.com>
- local mode only, no cloud syncing. 2 Options available:
  - Using version 9.8.x, work locally using the “Scratch Pad” option available from “Settings” menu (image below).
  - Have your team members agree to not log into the app at any point.

Additional questions around API testing tool standards may be directed to: Venkateswarlu Sama, [sama\\_venkateswarlu@cat.com](mailto:sama_venkateswarlu@cat.com).

For more information on using these testing tools to obtain credentials, please visit the Knowledgehub article - [https://digital.cat.com/knowledge-hub/articles/using\\_credentials](https://digital.cat.com/knowledge-hub/articles/using_credentials).
